ELEVATING SPACES

WHO ARE WE?

At Studio Porcelain, we are proud to be the exclusive distributor of Laminam in New South Wales, ACT & QLD.

We work with architects, interior designers, builders and homeowners to support projects from initial concept through to material selection and specification.

The Laminam collection offers large-format porcelain slabs for interiors, exteriors, benchtops, splashbacks, wall cladding, flooring, fireplaces, facades and custom furniture applications.

WHY LAMINAM?

- Italian made surfaces.
- Pioneer of large format porcelain slabs.
- Patented mould-free technology.
- Durable, hygienic and low maintenance.
- Suitable for indoor and outdoor applications.
- Fibreglass backing for strength.
- Sustainability focused.
- 150+ colours and finishes.

See Laminam handle heat, flames, knives, and daily kitchen use, watch it in action.

LAMINAM

Sizes & Thicknesses

LAMINAM LARGE FORMAT SLABS AND TILES

Sizes and thicknesses vary depending on the colour and finish.

Available thicknesses include 2mm, 3mm, 5mm, 12mm and 20mm.

Thickness availability varies by colour. Not all colours are available in every thickness.

Laminam slabs are surprisingly light and highly durable.

LAMINAM PORCELAIN SLAB THICKNESS

LAMINAM

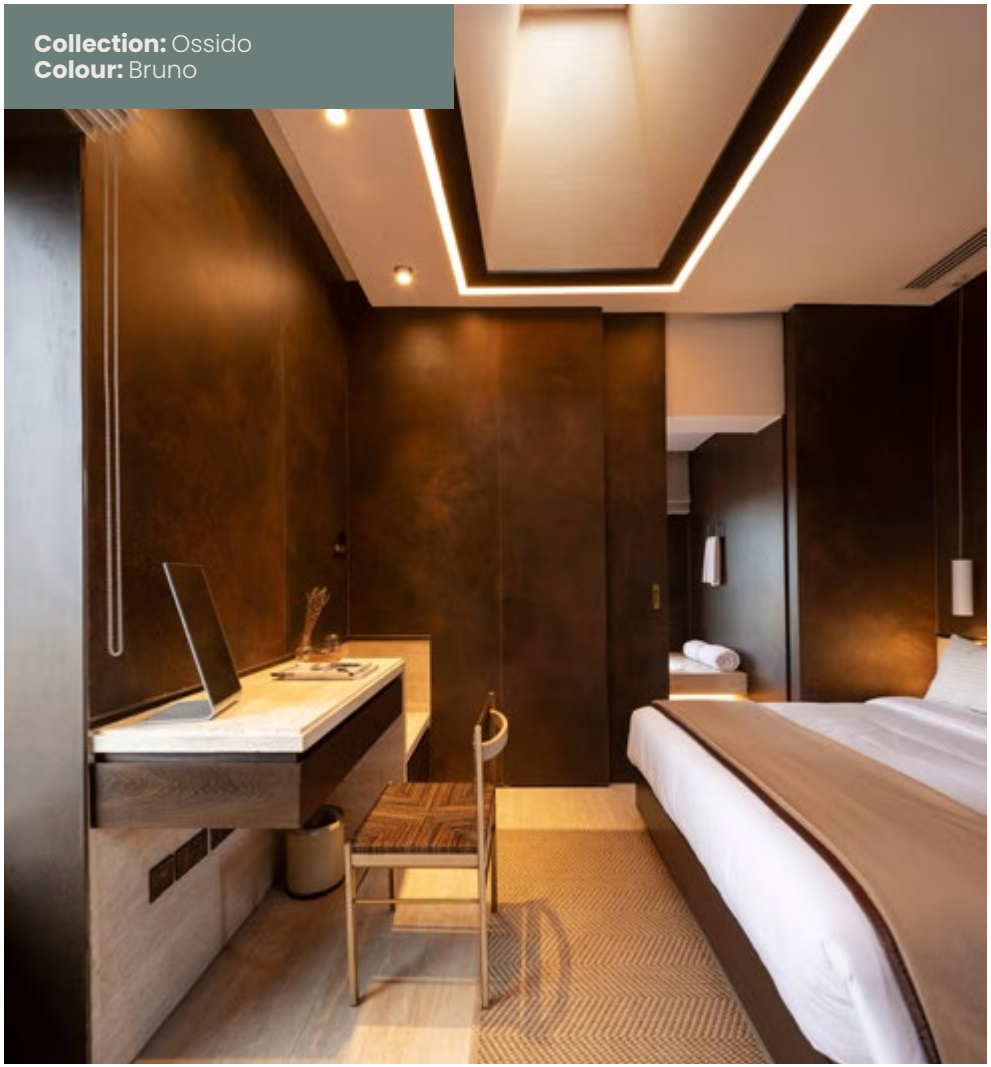
Applications

OUTDOOR WALL CLADDING

1000 × 3000 ×2mm Laminam slabs are suitable for outdoor wall cladding.
They are UV stable and designed to perform across diverse climates.

INDOOR WALL CLADDING

Laminam slabs in 2mm, 3mm and 5mm slabs are lightweight and durable, making them perfect for wall cladding.



JOINERY CLADDING

Laminam in 2mm, 3mm and 5mm can be used to clad joinery.
5mm Laminam can be mitred, while 2mm and 3mm require a butt joint.

Commercial Projects

Oblica Showroom

Oblica, a leader in contemporary fireplace design, has opened its new showroom in Rosebery, Sydney. A space that beautifully balances warmth, craftsmanship, and architectural elegance.

To create a seamless finish for its fireplace displays, Oblica collaborated with Studio Porcelain, the NSW distributor for Laminam, to clad their fireplaces in Laminam large format porcelain slabs.

The selected colours, Calce Avorio, Porfido Marrone, and Noir Desir were carefully chosen to complement the tones and textures of Oblica‘s product range.

University of Sydney Business School

The University of Sydney stands as a benchmark for contemporary educational architecture, an environment designed to foster collaboration, innovation, and excellence.

At the heart of this landmark project is a carefully considered material palette, where porcelain tiles play a critical role in both performance and aesthetics.

To meet the demands of a high-traffic institutional setting without compromising on design, Laminam's large-format porcelain tiles were selected as a key material solution. Specifically, the I Naturali collection in Pietra di Savoia Grigia brought together the timeless beauty of natural stone with the advanced durability of porcelain tiles, helping transform the University of Sydney into a cohesive, modern learning space.

Sydney International Convention Centre

Sitting proudly on Sydney's Darling Harbour, the International Convention Centre (ICC Sydney) is a landmark that reflects Australia's commitment to world-class design and sustainability. Designed by Studio Hassell+Populous, this project required materials that could meet very high standards for both aesthetics and performance.

For the ICC's dramatic soffit, which spans high above Darling Harbour's bustling precinct, Studio Hassell+Populous needed a surface that would be low-maintenance, withstand the test of time, and contribute to the building's sustainable design philosophy. Laminam's Oxide Bianco was selected for its ability to achieve all of these requirements while delivering a modern finish.

Axis Towers in Georgia

Laminam's large-format porcelain slabs and slim profile suit the twisting architecture of Axis Towers, offering design flexibility without the weight of thicker cladding materials.

Resistant to UV rays, moisture and temperature changes, Laminam helps preserve the façade's colour and finish through years of exposure.

Its durable, low-porosity surface is easy to clean and maintain, combining a refined appearance with practical benefits for high-rise façade upkeep.

Mercedes Benz Showroom in Germany

One of the world's highest regarded studios in terms of its multidisciplinary design that combines artistic spirit with technological know-how, Graft chose Laminam for the exterior of the new Mercedes-Benz dealership in Heilbronn having considered its refined aesthetic and innovation application. The façade is a perfect example of the certified bonding application system, executed in accordance with the German car manufacturer's brand guidelines.

Hotel Nodo in Chile

Hotel Nodo in Santiago, Chile, embodies the idea of “naturally urban”. Designed by architect Ricardo Stein, its forest-inspired façades feature Laminam surfaces treated with bioactive technology, making it South America’s first bioactive building.

Specialising in eco-sustainable architecture, Stein wanted the hotel to do more than visually evoke nature. He envisioned a building that could function like a forest, helping purify the air and actively combat urban pollution. Laminam’s bioactive cladding helped bring this vision to life, combining architectural expression with an environmental purpose.

Cagnazzi Residential Building in Italy

Within the urban fabric of Altamura, this apartment block designed by architect Mario Poggiani is a contemporary residential building designed in a simple yet bold language that dialogues effectively with the town's bright sunlight and Mediterranean character.

Its architecture is rooted in the combination of pure forms and tactile surfaces and creates a compositional system with a rhythmic alternation of solids and voids, generating depth and a kinship with the urban surroundings.
